

# roboX

- RoboX is designed for easy programming of complex interaction and tour sequences
- Not only does RoboX play music, he also speaks English, German, French, Italian...
- You can interact with RoboX and answer his questions by pressing on one of his four colored buttons
- RoboX reacts to his environment and expresses his emotions with his eyes and eyebrows
- A LED matrix in RoboX's right eye displays icons and short animations

- RoboX can see and follow you with his eyes
- He detects your position and tracks your movements with his laser scanner
- RoboX always knows where he is and where he has to go
- Even in very populated environments, RoboX moves safely and smoothly around people and objects
- Tactile plates, foam bumpers and a redundant control system guarantee safe operations for humans and surrounding objects, as well as for RoboX himself
